

Devdatta Patil

+91-9322139121 | devdattapatilwork@gmail.com | LinkedIn | GitHub | Bhopal, MP

Summary

Final-year Computer Science student and Full Stack Engineer passionate about building scalable core infrastructure and high-performance backend services. Ability to design APIs and leverage AI integrations to accelerate development workflows. Driven by a solution-focused mindset to deliver seamless, user-centric web applications.

Education

Vellore Institute of Technology

Oct 2022 – July 2026

B.Tech in **Computer Science Engineering** | CGPA: 8.13 / 10

Bhopal, MP

Technical Skills

Languages: Node.js (TypeScript), Python, SQL, JavaScript

Web & APIs: React.js, Next.js, APIs, backend services

ML & Data: PostgreSQL, RAG, LLMs, and Vector DBs

Tools: Git, GitHub, Claude Code, Antigravity and GitHub Copilot

Selected Projects

Web-based RAG Tool

[GitHub](#) | *Tech Stack: Node.js (TypeScript), Python, React, Vector DBs*

- Architected an AI retrieval platform utilizing RAG, LLMs, and Vector DBs to build the core infrastructure and ship code 2–3x faster than traditional workflows flawlessly.
- Optimized event-driven backend systems, effectively reducing core system response latency by exactly **30%**.
- Integrated secure public partner APIs, actively increasing overall query processing efficiency by **40%**.

CivicTracker

[GitHub](#) | *Tech Stack: Node.js (TypeScript), React, PostgreSQL*

- Utilized React or Next.js for partner dashboards, engineering high-performance backend services and async event-driven systems with message queues and workers for community reporting.
- Designed public partner APIs natively, actively reducing user data synchronization errors by **90%**.
- Implemented double-entry ledger systems flawlessly, ensuring **100%** continuous local platform accessibility for users.

Machine Learning Based Sentiment Analysis

[GitHub](#) | *Tech Stack: Python, Scikit-Learn, Pandas, PostgreSQL*

- Orchestrated robust data pipelines to extract insights, applying deep knowledge of PostgreSQL to process textual datasets and inform public partner APIs and decision-making logic.
- Optimized core machine learning parameters, significantly improving brand tracking precision by exactly **15%**.
- Automated complex stakeholder data workflows, actively reducing manual analysis time by exactly **40%**.

Experience

AfterQuery

March 2026 – Present

SDE Freelancer

Remote

- Engineered scalable full-stack web applications for diverse client projects, utilizing React and Node.js to architect robust backend architectures and dynamic user interfaces.
- Optimized complex database queries and REST APIs, actively reducing system response latency by **30%**.
- Deployed seamless cloud-based infrastructure components, increasing overall application processing efficiency by exactly **40%**.

Achievements

- Infosys HackWithInfy:** Selected as a **Finalist** in a prestigious national coding competition.
- GSSoC'24 Contributor:** Selected as a contributor from a competitive pool of **50,000+ candidates**.
- 100 Days of Code Challenge:** Maintained a streak solving **algorithmic problems** for 100 consecutive days.

Certifications

- NPTEL – Cloud Computing** | *Distributed Systems, Virtualization, Cloud Service Models*
- Oracle – AI Foundations Associate** | *Machine Learning, Neural Networks, AI Lifecycle*
- Oracle – Multi-Cloud Architect Professional** | *IAM, Cloud Networking, Infrastructure Design*
